Portopiccolo

Portopiccolo was born in a unique place, the most evocative of the Upper Adriatic, bathed by crystalline waters and set among the splendid Falesian cliffs that unite the Castle of Miramare and the Castle of Duino through the Bay of Sistiana.

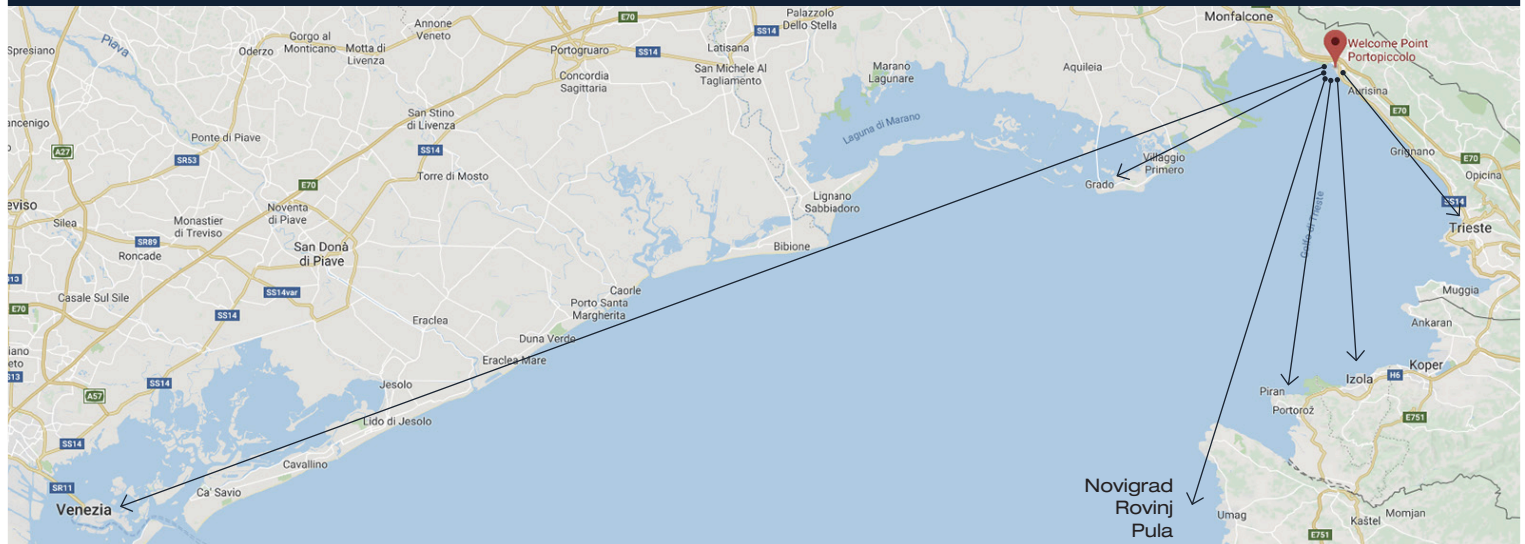

www.portopiccolosistiana.it

Just a few kilometres from Trieste, a multiform and cosmopolitan city, the heart of Mitteleuropa, 140km from Venice, Portopiccolo is situated in a strategic location with easy access to Austria and Central Europe.

Portopiccolo is a tale to be told in all its many facets: moving views to be enjoyed in the intimacy of one's own home or from any corner of Portopiccolo; an intense nature to be experienced between outings at sea and golf courses, relaxing in the sun or having fun in the bars that render this coast continuously stimulating. Sea places, but with the mountains at your back. Short summer excursions permit you to reach the surrounding hills and valleys, or Alpine paths, ideal destinations for excursions, horse-riding or mountain-biking. In winter, the renowned trails of the ski districts welcome those who cannot renounce the snow, and round out the services. Portopiccolo is to be lived 365 days a year.
